

Sergio Rivera Urrea

Java Backend Developer | Spring Boot · REST APIs · SQL · Power BI

Medellín, Colombia | 301 731 9664 | matambita08@gmail.com | www.linkedin.com/in/sergio-rivera-urrea | github.com/Serus38

Professional Profile

Backend Developer with a full stack approach, specialized in Java and Spring Boot, with experience building REST APIs, SQL integrations, and Power BI dashboards. Experience in a corporate environment under Agile SCRUM methodologies and Azure DevOps.

Professional Experience

Software Development (Apprentice) – Comfama

Aug 2025 – Feb 2026

- Developed 2 Power BI dashboards for real-time operational capacity analysis.
- Designed reports and integrated data from SQL Server and SharePoint for executive reporting.
- Built SQL queries for data extraction and validation.
- Process automation and improvement under SCRUM methodology using Azure DevOps.

Programming Mentor– Innovapues

Mar 2023 – May 2023

- Training in programming logic and computational thinking.
- Guided students in problem-solving and technical skill development.

Featured Projects

- **Shipment tracking REST API | Java · Spring Boot · MySQL · Vercel**
<https://github.com/Serus38/Test-dev.git>
 - Functional API with CRUD endpoints for shipment management and traceability status tracking.
 - REST architecture implementation with data validation and exception handling.
 - Deployed to production (Railway + Vercel).
- **Capacity Management Dashboard | Power BI, SQL Server**
https://github.com/Serus38/Dashboard_Gestion_Capacidad.git
(Project developed in a corporate environment – Comfama)
 - Generated insights for process optimization and decision-making.

Education

Software Development Technology Degree – I.U. Digital de Antioquia

Jan 2022 – Nov 2025

Languages

Spanish: Native | **English:** B1 (fluent technical reading, in progress)

Technologies

Backend: Java · Spring Boot · REST APIs · JPA/Hibernate · SQL Server · MySQL

Frontend: Angular · React · TypeScript

DevOps & Cloud: Docker · Azure DevOps · Git/GitHub · Vercel · Railway · Render · Netlify

Data & BI: Power BI · SQL Server · MySQL · MongoDB · Supabase

Other: Android Studio · Unity
